

## How to create perspectives for paper 3

### Example 1

By viewing the topic of international sport through the themes of economics, politics and ethics, global issues emerge. One such issue may be who should be responsible for funding events such as the Olympics. Different perspectives to emerge from this issue would include the following.

#### Perspective 1

Funding Olympic events is a drain on tax payers' money. This perspective may be based on different arguments about the value of the Olympics, the needs of the tax payer, the possible economic benefits, and the political popularity or unpopularity of spending public money. Behind the perspective may be assumptions and beliefs about the importance of international support relative to the costs of the Olympics.

This draws on the themes of economics and

politics. **Perspective 2**

Funding Olympic venues is worth the investment because of the profit they produce after the event. The key here is 'worth' and the assumption that for many reasons the Olympics is worth the investment for the resulting economic and financial benefits and also for the political prestige it brings to the host country. It

is not just individual arguments that are being explained and considered but also general outlooks on the funding of the Olympics which contain different assumptions, views, justifications and beliefs. It would also be possible to bring into these broad perspectives themes relating to culture, education and the moral importance of nations meeting and competing.

This draws on the themes of economics, politics, culture and ethics.

### Examples 2 and 3

The table below illustrates two examples of how exploring a global topic through different themes can lead to the generation of global issues and in turn to identifying different perspectives.

Global topic	Themes	Global issue	Perspectives
Example 2: Tourism	Culture Economics Environment Ethics	The extent to which tourist companies embrace ethical tourism	Tourist companies should be obliged to pay a local tax to help fund environmentally sound local projects. <b>OR</b> Tourist companies attract and generate wide economic benefits for a locality and should not be expected to pay local taxes on top of this.
Example 3:	Politics	The relationship	Unregulated control is essential for the

Rise of global superpowers

Economics  
Culture  
Technology

between regulation of the internet and the rise of a global superpower

emergence of a global superpower.

**OR**

A global superpower can only emerge if it controls the internet.
