

# Reference Citations in Text

## APA Forms and Styles

Document your study throughout the text by citing by author and date the works you used in your research. This style of citation briefly identifies the source for readers and enables them to locate the source of information in the alphabetical reference list at the end of the article. (See sections 4.03 to 4.15 on the preparation of the reference list.)

Include the surname of the author and the year of publication that are inserted in the text at the appropriate point:

Walker (2000) compared reaction times

In a recent study of reaction times (Walker, 2000)

## **Electronic media**

\*Using and citing Internet sources should observe the following two guidelines:

- 1.) Direct readers as closely as possible to the information being cited—whenever possible, reference specific documents rather than home or menu pages.
- 2.) Provide addresses that work.

\*A reference of an Internet source should provide a document title or description, a date (either the date of publication or update or the date of retrieval), and an address (in Internet terms, a uniform resource locator, or URL). Whenever possible, identify the authors of a document as well.
